

Who is Procure Analytics?

Procure Analytics (PA) is the premier data-forward, service-driven group purchasing organization specializing in complex, historically undermanaged indirect spend categories like Maintenance, Repair, and Operations (MRO), Packaging, Freight, and a number of other areas. PA combines over \$1.6 billion of purchasing leverage and supplier relationships, together with dedicated advisors, proprietary analytics, and artificial intelligence, to drive 5-15% immediate savings and 5-7% annual TCO savings for our members. PA's analytical and reporting tools offer the insight needed to optimize indirect procurement spend - all at no cost to members.

What is a Group Purchasing Organization (GPO)?

A GPO is a procurement hub that leverages the buying power of its hundreds of members to deliver economies of scale and supply chain savings.

Benefits of Working with Procure Analytics
